Subject Index of Volume 71

Acetals
  $Co_3(CO)_8$-catalysed carbonylation of, using *N*-silylamines, 15
Active carbon
  carboxymethylation of bromobenzene with Group VIII metals supported on; liquid phase carbonylation with solid catalyst, 347
Alcohols
  catalytic oxidation of benzoin and *p*-substituted benzhydrol by *p*-benzoquinone or air in presence of $[Fe^{II}(SPh)_4]^{2-}$ and $[Fe^{II}(SePh)_4]^{2-}$, 391
  cationic latices as cocatalyst in cobalt-phthalocyanine-catalysed oxidation of 2-mercaptoethanol, 245
  electrocatalytic oxidation of, on C electrodes modified by functionalized polypyrrole–RuO_2 films, 303
  Fischer–Tropsch synthesis: incorporation of ^{14}C-labelled normal and isoalcohols, 37
  hydroxylation of phenol over TS-2, titanium silicate molecular sieve, 373
  oxidation of propylene glycol and lactic acid to pyruvic acid in aqueous phase catalysed by Pb-modified Pd-on-C and related systems, 25
Alkanes
  cyclopropanation of electron-deficient olefins with *gem*-dibromoalkanes catalysed by Ni(0) complexes and Zn, 7
  hypochlorite-oxyfunctionalization of saturated hydrocarbons catalysed by Ru(II) complexes, 149
Alkenes, Olefins
  cyclopropanation of electron-deficient olefins with *gem*-dibromoalkanes catalysed by Ni(0) complexes and Zn, 7
  homogeneous hydrogenation of conjugated dienes catalysed by naphthalenetricarbonylchromium, 291
  hydroformylation of, catalysed by Rh and Co clusters supported on organic (Dower) resins, 281
  oxidation of propylene glycol and lactic acid to pyruvic acid in aqueous phase catalysed by Pb-modified Pd-on-C and related systems, 25
Aluminium
  influence of alloying Pt for hydrogenation of *p*-chloronitrobenzene over PtM/Al_2O_3 catalysts with M = Sn, Pb, Ge, Al, Zn, 317
  ^{51}V NMR study of strongly bound vanadia in V_2O_5/Al_2O_3 catalysts, 69
Amine-functionalized BDPP
  and chiraphos; immobilization of Rh complexes of, on soluble form of strongly acidic Nafion-H cation exchange resin, 365
Ammoximation
  heterogeneously catalysed gas-phase; FT–IR and flow reactor studies on, of cyclohexanone, 101
Amphiphiles
  increase in activity and enantioselectivity in asymmetric hydrogenation reactions catalysed by chiral Rh(I) complexes as consequence of action of, L1
Aromatic compounds
  catalyst deactivation during hydrogenation of benzene over Ni-loaded Y zeolites, 83
  catalytic oxidation of benzoin and *p*-substituted benzhydrol by *p*-benzoquinone or air in presence of $[Fe^{II}(SPh)_4]^{2-}$ and $[Fe^{II}(SePh)_4]^{2-}$, 391
  cationic latices as cocatalyst in cobalt-phthalocyanine-catalysed oxidation of 2-mercaptoethanol, 245
  electrocatalytic oxidation of alcohols on C electrodes modified by functionalized polypyrrole–RuO_2 films, 303
  homogeneous hydrogenation of conjugated dienes catalysed by naphthalenetricarbonylchromium, 291
  hydrogenation activity of $[Ru_3(\mu\text{-H})(\mu_3\text{-ampy})(CO)_9]$ under homogeneous conditions (ampy = 2-amino-6-methylpyridine), L7

hydroxylation of phenol over TS-2, titanium silicate molecular sieve, 373
influence of alloying Pt for hydrogenation of *p*-chloronitrobenzene over PtM/Al_2O_3 catalysts with M = Sn, Pb, Ge, Al, Zn, 317
liquid phase carbonylation with solid catalyst: carboxymethylation of bromobenzene with Group VIII metals supported on active C, 347
oxidation of 3-hydroxyflavones in presence of Cu(I) and Cu(II) chlorides, 1
Ascorbate
thermodynamic aspects of Ru(III)–EDTA–ascorbate–molecular oxygen system for oxidation of saturated and unsaturated organic compounds, 157

Carbon electrodes
modified by functionalized polypyrrole–RuO_2 films; electrocatalytic oxidation of alcohols on, 303
Carbonylation
$Co_3(CO)_8$-catalysed, of acetals using *N*-silylamines, 15
liquid phase, with solid catalyst: carboxymethylation of bromobenzene with Group VIII metals supported on active C, 347
Carboxymethylation
of bromobenzene with Group VIII metals supported on active C; liquid phase carbonylation with solid catalyst, 347
Ceramics
comparison of TiO_2 powder suspensions and TiO_2 ceramic membranes supported on glass as photocatalytic systems in reduction of Cr(VI), 57
Chiraphos
immobilization of Rh complexes of amine-functionalized BDPP and chiraphos on soluble form of strongly acidic Nafion-H cation exchange resin, 365
Chromium
comparison of TiO_2 powder suspensions and TiO_2 ceramic membranes supported on glass as photocatalytic systems in reduction of Cr(VI), 57
homogeneous hydrogenation of conjugated dienes catalysed by naphthalenetricarbonylchromium, 291
Chymotrypsin
α-: alteration of substrate specificity of, by modification process; organic reactions catalysed by modified enzymes, 261
^{14}C labelling
Fischer–Tropsch synthesis: incorporation of ^{14}C-labelled normal and isoalcohols, 37
Clusters
Rh and Co; hydroformylation of olefins catalysed by, supported on organic (Dower) resins, 281
Cobalt
cationic latices as cocatalyst in cobalt-phthalocyanine-catalysed oxidation of 2-mercaptoethanol, 245
$Co_3(CO)_8$-catalysed carbonylation of acetals using *N*-silylamines, 15
hydroformylation of olefins catalysed by Rh and Co clusters supported on organic (Dower) resins, 281
kinetics and mechanism of decomposition of dibridged Co dioxygen complexes of amino acid derivatives in alkaline medium, 383
multicomponent Co–MgO–NaZSM-5 catalyst for hydrocarbon synthesis from $CO + H_2$ mixtures containing CO_2 and/or N_2, 183
promoter effect of Cu, Co and K on Fe/MgO in CO hydrogenation, 71
Copper
oxidation of 3-hydroxyflavones in presence of Cu(I) and Cu(II) chlorides, 1
promoter effect of Cu, Co and K on Fe/MgO in CO hydrogenation, 71
Cyclohexanone
FT–IR and flow reactor studies on heterogeneously catalysed gas-phase ammoximation of, 101
Cyclopropanation
of electron-deficient olefins with *gem*-dibromoalkanes catalysed by Ni(0) complexes and Zn, 7

Deactivation
catalyst, during hydrogenation of benzene over Ni-loaded Y zeolites, 83
Decomposition
kinetics and mechanism of, of dibridged Co dioxygen complexes of amino acid derivatives in alkaline medium, 383

Dimethyl sulphide
kinetics and mechanism of oxidation of, with molecular oxygen catalysed by K[Ru^{III}(EDTA–H)Cl] complex in water–dioxan medium, 177

Enzymes
modified: organic reactions catalysed by; alternation of substrate specificity of α-chymotrypsin by modification process, 261

Films
functionalized polypyrrole–RuO_2; electrocatalytic oxidation of alcohols on C electrodes modified by, 303
Fischer–Tropsch synthesis
incorporation of ^{14}C-labelled normal and isoalcohols, 37
Flow reactor studies
and FT–IR studies on heterogeneously catalysed gas-phase ammoximation of cyclohexanone, 101

Germanium
influence of alloying Pt for hydrogenation of *p*-chloronitrobenzene over PtM/Al_2O_3 catalysts with M = Sn, Pb, Ge, Al, Zn, 317
Glass
comparison of TiO_2 powder suspensions and TiO_2 ceramic membranes supported on glass as photocatalytic systems in reduction of Cr(VI), 57
Group VIII metals
carboxymethylation of bromobenzene with, supported on active C; liquid phase carbonylation with solid catalyst, 347

Hydrocarbon synthesis
multicomponent Co–MgO–NaZSM-5 catalyst for, from $CO + H_2$ mixtures containing CO_2 and/or N_2, 183
Hydroformylation
of olefins catalysed by Rh and Co clusters supported on organic (Dower) resins, 281
Hydrogenation
activity of [$Ru_3(\mu$-H)$(\mu_3$-ampy)$(CO)_9$] under homogeneous conditions (ampy = 2-amino-6-methylpyridine), L7
catalyst deactivation during, of benzene over Ni-loaded Y zeolites, 83
catalytic CO; pulse reactor–gas chromatographic investigation of kinetics of, 357
CO; promoter effect of Cu, Co and K on Fe/MgO in, 71
CO: table, selective catalyst for; Rh in basic zeolite Y, 335
homogeneous, of conjugated dienes catalysed by naphthalenetricarbonylchromium, 291
increase in activity and enantioselectivity in asymmetric hydrogenation reactions catalysed by chiral Rh(I) complexes as consequence of action of amphiphiles, L1
influence of alloying Pt for, of *p*-chloronitrobenzene over PtM/Al_2O_3 catalysts with M = Sn, Pb, Ge, Al, Zn, 317
MgO-supported CO, catalysts derived from [$H_3ReOs_3(CO)_{13}$], 215
Hydroxylation
of phenol over TS-2, titanium silicate molecular sieve, 373
Hypochlorite-oxyfunctionalization
of saturated hydrocarbons catalysed by Ru(II) complexes, 149

Immobilization
of Rh complexes of amine-functionalized BDPP and chiraphos on soluble form of strongly acidic Nafion-H cation exchange resin, 365
Iron
catalytic oxidation of benzoin and *p*-substituted benzhydrol by *p*-benzoquinone or air in presence of $[Fe^{II}(SPh)_4]^{2-}$ and $[Fe^{II}(SePh)_4]^{2-}$, 391
kinetic study of isobutyric acid oxydehydrogenation on various Fe–P–O catalysts: proposal for reaction mechanism, 199
promoter effect of Cu, Co and K on Fe/MgO in CO hydrogenation, 71
Isobutyric acid oxydehydrogenation
kinetic study of, on various Fe–P–O catalysts: proposal for reaction mechanism, 199

Lactic acid
and propylene glycol; oxidation of, to pyruvic acid in aqueous phase catalysed by Pb-modified Pd-on-C and related systems, 25

Lead
influence of alloying Pt for hydrogenation of *p*-chloronitrobenzene over PtM/Al_2O_3 catalysts with M = Sn, Pb, Ge, Al, Zn, 317
oxidation of propylene glycol and lactic acid to pyruvic acid in aqueous phase catalysed by Pb-modified Pd-on-C and related systems, 25

Magnesium
MgO-supported CO hydrogenation catalysts derived from $[H_3ReOs_3(CO)_{13}]$, 215
multicomponent Co–MgO–NaZSM-5 catalyst for hydrocarbon synthesis from $CO + H_2$ mixtures containing CO_2 and/or N_2, 183
promoter effect of Cu, Co and K on Fe/MgO in CO hydrogenation, 71
Membranes
comparison of TiO_2 powder suspensions and TiO_2 ceramic membranes supported on glass as photocatalytic systems in reduction of Cr(VI), 57
Mercaptoethanol
2-: cationic latices as cocatalyst in cobaltphthalocyanine-catalysed oxidation of, 245
Mordenites
FT–IR study of effects of water pretreatment on acid sites and dispersion of metal particles in Y zeolites and, 233

Nickel
catalyst deactivation during hydrogenation of benzene over Ni-loaded Y zeolites, 83
cyclopropanation of electron-deficient olefins with *gem*-dibromoalkanes catalysed by Ni(0) complexes and Zn, 7

Olefins: see Alkenes
Osmium
MgO-supported CO hydrogenation catalysts derived from $[H_3ReOs_3(CO)_{13}]$, 215
Oxidation
catalytic, of benzoin and *p*-substituted benzhydrol by *p*-benzoquinone or air in presence of $[Fe^{II}(SPh)_4]^{2-}$ and $[Fe^{II}(SePh)_4]^{2-}$, 391
cobaltphthalocyanine-catalysed; cationic latices as cocatalyst in, of 2-mercaptoethanol, 245
electrocatalytic, of alcohols on C electrodes modified by functionalized polypyrrole–RuO_2 films, 303
of 3-hydroxyflavones in presence of Cu(I) and Cu(II) chlorides, 1
kinetics and mechanism of, of dimethyl sulphide with molecular oxygen catalysed by $K[Ru^{III}(EDTA–H)Cl]$ complex in water–dioxan medium, 177
of propylene glycol and lactic acid to pyruvic acid in aqueous phase catalysed by Pb-modified Pd-on-C and related systems, 25
thermodynamic aspects of Ru(III)–EDTA–ascorbate–molecular oxygen system for, of saturated and unsaturated organic compounds, 157
Oxydehydrogenation
isobutyric acid: kinetic study of, on various Fe–P–O catalysts; proposal for reaction mechanism, 199
Oxygen
kinetics and mechanism of decomposition of dibridged Co dioxygen complexes of amino acid derivatives in alkaline medium, 383
kinetics and mechanism of oxidation of dimethyl sulphide with molecular oxygen catalysed by $K[Ru^{III}(EDTA–H)Cl]$ complex in water–dioxan medium, 177
kinetic study of isobutyric acid oxydehydrogenation on various Fe–P–O catalysts: proposal for reaction mechanism, 199
thermodynamic aspects of Ru(III)–EDTA–ascorbate–molecular oxygen system for oxidation of saturated and unsaturated organic compounds, 157

Palladium
oxidation of propylene glycol and lactic acid to pyruvic acid in aqueous phase catalysed by Pb-modified Pd-on-C and related systems, 25
Phosphorus
kinetic study of isobutyric acid oxydehydrogenation on various Fe–P–O catalysts: proposal for reaction mechanism, 199

Physicochemical properties
and catalytic properties of titanium silicalites, 119
Platinum
influence of alloying Pt for hydrogenation of *p*-chloronitrobenzene over PtM/Al_2O_3 catalysts with M = Sn, Pb, Ge, Al, Zn, 317
Potassium
kinetics and mechanism of oxidation of dimethyl sulphide with molecular oxygen catalysed by $K[Ru^{III}(EDTA–H)Cl]$ complex in water–dioxan medium, 177
promoter effect of Cu, Co and K on Fe/MgO in CO hydrogenation, 71
Pulse reactor–gas chromatographic investigation
of kinetics of catalytic CO hydrogenation, 357
Pyruvic acid
oxidation of propylene glycol and lactic acid to, in aqueous phase catalysed by Pb-modified Pd-on-C and related systems, 25

Reduction
comparison of TiO_2 powder suspensions and TiO_2 ceramic membranes supported on glass as photocatalytic systems in, of Cr(VI), 57
Resin(s)
organic (Dower); hydroformylation of olefins catalysed by Rh and Co clusters supported on, 281
strongly acidic Nafion-H cation exchange; immobilization of Rh complexes of amine-functionalized BDPP and chiraphos on soluble form of, 365
Rhenium
MgO-supported CO hydrogenation catalysts derived from $[H_3ReOs_3(CO)_{13}]$, 215
Rhodium
in basic zeolite Y: stable, selective catalyst for CO hydrogenation, 335
hydroformylation of olefins catalysed by Rh and Co clusters supported on organic (Dower) resins, 281
immobilization of Rh complexes of amine-functionalized BDPP and chiraphos on soluble form of strongly acidic Nafion-H cation exchange resin, 365
increase in activity and enantioselectivity in asymmetric hydrogenation reactions catalysed by chiral Rh(I) complexes as consequence of action of amphiphiles, L1
Ruthenium
electrocatalytic oxidation of alcohols on C electrodes modified by functionalized polypyrrole–RuO_2 films, 303
hydrogenation activity of $[Ru_3(\mu\text{-}H)(\mu_3\text{-}ampy)(CO)_9]$ under homogeneous conditions (ampy = 2-amino-6-methylpyridine), L7
hypochlorite-oxyfunctionalization of saturated hydrocarbons catalysed by Ru(II) complexes, 149
kinetics and mechanism of oxidation of dimethyl sulphide with molecular oxygen catalysed by $K[Ru^{III}(EDTA–H)Cl]$ complex in water–dioxan medium, 177
thermodynamic aspects of Ru(III)–EDTA–ascorbate–molecular oxygen system for oxidation of saturated and unsaturated organic compounds, 157

Silicon
$Co_2(CO)_8$-catalysed carbonylation of acetals using *N*-silylamines, 15
hydroxylation of phenol over TS-2, titanium silicate molecular sieve, 373
physicochemical and catalytic properties of titanium silicalites, 119
Sodium
multicomponent Co–MgO–NaZSM-5 catalyst for hydrocarbon synthesis from $CO + H_2$ mixtures containing CO_2 and/or N_2, 183
Spectroscopy
FT–IR and flow reactor studies on heterogeneously catalysed gas-phase ammoximation of cyclohexanone, 101
FT–IR study of effects of water pretreatment on acid sites and dispersion of metal particles in Y zeolites and mordenites, 233
^{51}V NMR study of strongly bound vanadia in V_2O_5/Al_2O_3 catalysts, 69

Thermodynamic aspects
of Ru(III)–EDTA–ascorbate–molecular oxygen system for oxidation of satu-

rated and unsaturated organic compounds, 157
Tin
influence of alloying Pt for hydrogenation of *p*-chloronitrobenzene over PtM/Al_2O_3 catalysts with M = Sn, Pb, Ge, Al, Zn, 317
Titanium
comparison of TiO_2 powder suspensions and TiO_2 ceramic membranes supported on glass as photocatalytic systems in reduction of Cr(VI), 57
hydroxylation of phenol over TS-2, titanium silicate molecular sieve, 373
physicochemical and catalytic properties of titanium silicalites, 119

Vanadium
^{51}V NMR study of strongly bound vanadia in V_2O_5/Al_2O_3 catalysts, 69

Water–dioxan medium
kinetics and mechanism of oxidation of dimethyl sulphide with molecular oxygen catalysed by $K[Ru^{III}(EDTA–H)Cl]$ complex in, 177
Water pretreatment
FT–IR study of effects of, on acid sites and dispersion of metal particles in Y zeolites and mordenites, 233

Yttrium
catalyst deactivation during hydrogenation of benzene over Ni-loaded Y zeolites, 83
FT–IR study of effects of water pretreatment on acid sites and dispersion of metal particles in Y zeolites and mordenites, 233
Rh in basic zeolite Y: stable, selective catalyst for CO hydrogenation, 335

Zeolites
catalyst deactivation during hydrogenation of benzene over Ni-loaded Y zeolites, 83
FT–IR study of effects of water pretreatment on acid sites and dispersion of metal particles in Y zeolites and mordenites, 233
multicomponent Co–MgO–NaZSM-5 catalyst for hydrocarbon synthesis from $CO + H_2$ mixtures containing CO_2 and/or N_2, 183
Rh in basic zeolite Y: stable, selective catalyst for CO hydrogenation, 335
Zinc
cyclopropanation of electron-deficient olefins with *gem*-dibromoalkanes catalysed by Ni(0) complexes and, 7
influence of alloying Pt for hydrogenation of *p*-chloronitrobenzene over PtM/Al_2O_3 catalysts with M = Sn, Pb, Ge, Al, Zn, 317
